HEDIS Measure: Adolescent Well Care

How can we improve the score of this HEDIS measure?

Use correct diagnosis and procedure codes.
Submit claims and encounter data in a timely manner.
Documentation in the medical record indicating a visit and
evidence of all of the following:
• A health and developmental history (physical and mental)
• A physical exam
• Health education/anticipatory guidance

Preventive Services may be rendered on visits other than well-child visits. Well-child preventive services count toward the measures, regardless of the primary intent of the visit. But the services that are specific to an acute or chronic condition do not count toward the measure.

Adolescent Well Care Visit

This measure exists to ensure all patients within the recommended age band receive the recommended screening and is identifiable by:
• The percentage of enrolled members 12-21 years of age who had at least one comprehensive Well-Care visit with a PCP or OBGYN practitioner during the measurement year
