Guidance for setting 2019 TCOC Thresholds for High Volume PCMHs

1. Use all TaxIDs with 500 or more point-in-time members on December 31, 2017. Use a panel based on the run date you have closest to 12/31/2017.
2. Use risk adjusted TCOC from CY17 calculated in accordance with the Primary Care Medical Home (PCMH) Detailed Business Requirements (DBR)
3. Rank TaxIDs from high to low cost.
4. Identify the 5th and 95th percentiles for cost.
5. Segment the remaining cost range into five (5) bands, equally distributed by cost.
6. Assign stars based on the band that contains the provider's risk adjusted TCOC
